$F_A((1+\beta)/2)$
$F_S((1+\beta)/2)$
one loop, D (AA)
one loop, $-D$ (HH)
two loops, $\mathcal{C}^3$ coefficient
two loops, $\mathcal{C}^2$ coefficient
forward coefficient/normalisation
(a)
(b)
each pair: left $(N_c, n_f) = (3, 5)$,
right $(N_c, n_f) = (4, 2)$
|fit/prediction − 1|
